WORK EXPERIENCE

CNA Financial Corporation
Chicago, IL
Senior Data Management Analyst
July 2025 - Present

- Collaborate with leaders and business partners to understand analytical requirements, identify appropriate data sources, and deliver information that supports the expected outcomes.
- Heavily leverage BigQuery SQL to create or adapt data models that are enabled and regularly updated in a cloud environment.
- Employ a standard production deployment process for created datasets to Google BigQuery and Power BI online, ensuring communication with stakeholders throughout the process.
- Support and enhance data processes by building out controls, validating, and adding capability to common datasets while ensuring reliability and data integrity.

CDW
Chicago, IL
Senior Data Analyst - Product and Partner Management
August 2021 - July 2025

- Promoted to Senior Data Analyst (Oct 2023) for leading high-impact cross-functional initiatives and mentoring junior analysts.
- Developed executive-level performance reports for VPs and shareholders, enabling data-driven strategic decisions.
- Led SQL-based data migration to AWS cloud, cutting query processing times by 20% and improving scalability.
- Built Power BI forecasting models across four product categories, increasing budget accuracy by 10%.
- Designed market share analysis reports, uncovering expansion opportunities and driving entries into new markets.

Data Analyst - Product and Partner Management

- Converted partner finance dashboards from Excel to Power BI, saving 10 hours/week through automation and improved usability.
- Mentored 6+ new analysts, enhancing onboarding efficiency and contributing to overall team productivity.
- Built attach-based analytics reports, uncovering transaction trends that led to a 12% increase in orders.
- Designed actionable reporting tools to improve data quality, monitor open orders, and strengthen partner compliance management.

Compass Mortgage
Warrenville, IL
Data Analyst
June 2019 - August 2021

- Managed data organization, the design and implementation of data, and overall development of SQL database.
- Wrote and executed SQL queries to provide custom Sisense reports and analysis for senior management.
- Optimized Salesforce CRM data structures, improving sync efficiency by 20%.
- Earned 3 awards for statistical analysis and performance (2019-2021).
